Federico Tomadin

Full-stack Developer || React, .NET, Angular, Typescript, Node ||
Team Lead | DevOps Engineer | Backend Developer
Reconquista, Santa Fe, Argentina

Summary

I am a Full-stack Developer with over 8 years of experience, skilled in web and backend development. I have been using in the last 4 years technologies like React, .NET, TypeScript, Node.js, and RESTful APIs. I have successfully delivered projects in various domains, focusing on performance, scalability, quality, and UX. I can also work with relational and non-relational databases like PostgreSQL, MySQL, and MongoDB. I have experience working in industries such as insurance, e-commerce, tourism, and compliance.

You may contact me at federicotomadin@gmail.com for opportunities.

Experience

JBK Argentina
Full-stack Developer
December 2025 - Present (6 months)
United States

RISC // Your Compliance Partner
Full-stack Developer
November 2023 - November 2025 (2 years 1 month)
United States

- Leadership: Lead the end-to-end development of the company website, defining the full-stack architecture and owning both frontend and backend implementation.

- Technical Complexity: Built a real-time, scalable solution by integrating webhooks, Azure Functions, and payment processing via Authorize.net.

- Business Impact: Delivered a fully integrated digital presence that improved user engagement, streamlined operations, and enabled secure online transactions.

TheoremOne

Full-stack Developer

November 2022 - October 2023 (1 year)

California, United States

At SimpliSafe:

- Technical Complexity: Tackled architectural challenges during the migration from micro-frontends to an Nx Monorepo, integrating multiple codebases and dependencies.

- Business Impact: Enhanced site performance and developer productivity through the Nx migration, reducing build times and streamlining cross-team collaboration.

At WeAreProof:

- Leadership: Spearheaded the integration of Slack API features, enabling command handling and chatbot interactions that boosted team collaboration.

- Technical Complexity: Orchestrated seamless integration between Codility, Bullhorn, and MongoDB within a Nest.js backend, managing complex data flows and external APIs.

- Business Impact: Improved recruitment workflow efficiency in the Interlan project by automating assessments and notifications, directly enhancing client delivery speed.

DMI (Digital Management, LLC)

Full Stack Developer

March 2022 - November 2022 (9 months)

Texas, United States

- 1 - Technical Complexity: Navigated the challenges of a micro-frontend architecture using Angular 9+ while coordinating backend services and Adobe data migrations.

2 - Business Impact: Contributed to a scalable and maintainable client platform that improved performance and supported critical insurance operations.

SIDESYS IT SOLUTIONS

Backend developer and solution architect

March 2021 - March 2022 (1 year 1 month)

Entre Ríos, Argentina

- Leadership: Lead a cross-functional team as Solution Architect, overseeing the end-to-end delivery of a cloud-native, microservices-based system.

- Technical Complexity: Designed and deployed a scalable architecture using .NET, gRPC, Docker, and Kubernetes (AKS), with CI/CD pipelines across multiple environments.

- Business Impact: Delivered a robust platform that accelerated deployment cycles, improved system reliability, and aligned with modern DevSecOps standards.

Freelance

1 year 7 months

Merlin Connect

December 2020 - December 2021 (1 year 1 month)

Madrid, Community of Madrid, Spain

- Leadership: Designed and implemented the full architecture of a PWA, leading development from concept to deployment.

- Technical Complexity: Integrated Angular 11 with a PHP Slim backend and Google Calendar API to enable real-time scheduling and communication.

- Business Impact: Delivered a streamlined platform that simplified appointment management between consultants and teachers, enhancing efficiency and user experience.

Excel Validator for IBM Databases

September 2020 - November 2020 (3 months)

Madrid, Community of Madrid, Spain

System in .net 5.0 C# to validate Excel files for enter them to IBM database.

Salada App

June 2020 - October 2020 (5 months)

Argentina

- Leadership: Coordinated frontend and backend efforts within a university team to deliver a fully functional mobile and web e-commerce platform.
- Technical Complexity: Combined Angular 9+ with PHP and Ruby on Rails, integrating RESTful APIs and MySQL for a cohesive, full-stack solution.
- Business Impact: Created a smooth shopping experience that demonstrated practical skills in real-world e-commerce development and teamwork.

Tangol Tours

Full-stack Developer

March 2019 - March 2021 (2 years 1 month)

San Telmo

- Leadership: Led the end-to-end development and deployment of a high-performance web application using ASP.NET and C#, managing both code and infrastructure.
- Technical Complexity: Integrated multiple third-party services via RESTful APIs and implemented real-time updates using webhooks, while ensuring secure IIS deployment.
- Business Impact: Delivered a reliable solution that improved operational efficiency and user satisfaction by exceeding performance and integration expectations.

Plataforma 10

Backend Developer

February 2017 - February 2019 (2 years 1 month)

Barrio de Caballito - CABA

- Leadership: Drove full-cycle development and deployment of a web application, ensuring quality and timely delivery in a Scrum-based team.
- Technical Complexity: Built and maintained robust ASP.NET components with RESTful APIs, jQuery interactivity, and NUnit-tested backend logic.
- Business Impact: Delivered a stable, high-performing application that streamlined updates and enhanced user experience through dynamic features and reliable backend services.
